SECURITY          DPD 1842-62          20 March 1962

NRO

The DCI expressed to Dr. Scoville the desire that CIA should control the security systems of each and every program within the NRP domain. (This did not include clearances in programs such as SAMOS and MIDAS but CIA would be the central point of record for all clearances and responsible for inter-Agency coordination, clearance recordation and dissemination of clearance information on all of them.

In view of the sweeping implications of this statement Mr. Cunningham felt it necessary to discuss the whole situation with the Director of Security since a question of manpower and budget for added security staff would be involved.

NRO review(s) completed.
